## **DETAILED ACTION**

### ***Double Patenting***

Claims 1-21 and 33-40 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-19 of U.S. Patent No. 6,635,921. Although the conflicting claims are not identical, they are not patentably distinct from each other because of the reasons set forth in the Office action of 7 April 2005.

### ***Conclusion***

Applicant's argument of 29 June 2005 have been considered, but are not convincing. Applicant argues that transistors laid out in a line need not be "in series." A line is a geometric or physical series, however. Note that the claim language encompasses any kind of series, a specific electrical connection is not required. Applicant argues that the patented claims include limitations not present in the pending claims. The pending claims are written in open claim language, however, ("comprising") and thus encompass limitations not specifically listed, including limitations of the patented claims. (A teaching of "A + B" anticipates "A.") Anticipation is the epitome of obviousness. Applicant argues that patented claims 13 and 33 do not necessarily require specific features of the pending claims. These patented claims are broader than the pending claims, hence they are generic to the pending claims, in the sense noted. A genus will usually anticipate a species. The scope or breadth of the patented claims is properly determined by reference to the specification in which these claims appear.

Where it is clear that generic patented claims are intended to encompass features set forth in pending species claims, then the situation is that of anticipation, and anticipation, again, is the epitome of obviousness. No motivation to modify is required where the patented claim anticipates a pending claim. Note also that terminology, such as "gate," in pending claims, is given its broadest reasonable interpretation. Figure 3A of the '021 patent certainly shows a gate layer extending across an entire underlying channel. The "gate" may of course "comprise" other layers, without modifying the conclusion.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
